Full Feature Remote with Purifire™
User’s Guide

Operation

A. Room Temperature
B. Set Temperature
C. Dimmer
D. Flame Speed Control
E. Sleep Timer
F. Purifire™
G. Purifire™ On/Off
H. Flame & Heat On/Off
I. Temperature Down
J. Temperature Up
K. Dimmer Down
L. Dimmer Up
M. Flame Speed Down
N. Flame Speed Up
O. Sleep Timer Down
P. Sleep Timer Up
Q. Purifire™ Speed Down
R. Purifire™ Speed Up

D. Flame Speed Control
While the fireplace is running, press the N. Flame Speed Up button to increase the speed of the flame or press the M. Flame Speed Down to decrease the speed of the flame.

E. Sleep Timer
The Sleep Timer automatically shuts off the fireplace after a preset time (from 30 minutes to 8 hours).
During fireplace operation, to set the sleep timer press the P. Sleep Timer Up button. Set the timer from 30 minutes through 8 hours. The fireplace will automatically turn off when the sleep timer reaches zero (0) minutes.
The sleep timer can be cancelled at any time by pressing the O. Sleep Timer Down button repeatedly until the sleep timer displays "0".

F. Purifire™
Press the G. Purifire™ On/Off button to turn the Purifire™ function on. When the Purifire™ function is on the Purifire™ symbol will flash. When off, the symbol will be solid. The default setting for the Purifire™ is set at low speed. Press the Q. Purifire™ Speed Down or the R. Purifire™ Speed Up buttons to change between low and high speeds.
Press the G. Purifire™ On/Off button to turn the Purifire™ function off.

H. Flame & Heat On/Off Button
Press the H. Flame & Heat On/Off button to turn the fireplace on. Press the J. Temperature Up or the K. Dimmer Down buttons to adjust the set temperature. Press the J. Temperature Up or the I. Temperature Down buttons to maintain the desired set temperature.

I. NOTE: When using the remote control the heater runs on a thermostat. Press the J. Temperature Up or the I. Temperature Down buttons to adjust the set temperature.

Child Lock (Figure 1)

Figure 1

1. Depress tab on the battery cover on the back of the remote transmitter and remove the battery cover.
2. Move Child Lock tab to the right to lock the remote transmitter.
3. Move Child Lock tab back to the left to unlock the remote transmitter.
4. Replace the battery cover.

! NOTE: To temporarily unlock the remote transmitter press (in order) I. Temperature Down then J. Temperature Up then K. Dimmer Down.

When the remote transmitter’s backlight is illuminated the Child Lock is bypassed. When the backlight is off the Child Lock is re-activated.
**Initialization**

Follow steps 1 through 7 to initialize or re-initialize the remote with the fireplace:

1. Plug cord into 120 Volt wall outlet.
2. Ensure the Main On/Off Switch located in the switch box on the fireplace in the lower right hand corner is in the **ON** position (Figure 2).

**Figure 2**

A. Main On/Off Switch  
B. 3 Position Manual Control Switch  
C. Initialization Button

3. Set the 3 Position Manual Control to the **Remote** position (left position).
4. Press and hold the Initialization Button on the unit (Figure 2).
5. While holding the Initialization Button, press the Flame & Heat On/Off button or the Purifire™ On/Off button on the remote control transmitter.
6. Release the Initialization Button on the unit.
7. Press the Flame & Heat On/Off button to turn the flame/heat function on or press the Purifire™ On/Off button to turn the Purifire™ function on.

**Battery Replacement**

1. Depress tab on the Battery Cover on the back of the remote transmitter and remove battery cover (Figure 3).

**Figure 3**

![Battery Cover Tab](image)

2. Replace the two (2) AAA batteries into the remote control as shown in Figure 4.

**Figure 4**

![Batteries (2) Child Lock](image)

3. Ensure child lock is in the “unlocked” position (Figure 1, page 1).
4. Replace the battery cover.

**Frequency Interference**

If the fireplace does not respond properly to the remote control, the remote operating frequency may have to be reset. The remote control can send another frequency code to the circuit board to eliminate interference.

1. Simultaneously press the **O. Sleep Timer Down** button and the **Q. Purifire™ Speed Down** button on the remote control (refer to the Operation section on page 1 for a description of the remote’s buttons and functions).
2. “COD” will appear in place of the sleep timer digits.
3. Release the **Sleep Timer Down** and the **Purifire™ Speed Down** buttons.
4. Press the Initialization Button on the fireplace (Figure 2-C).
5. Press the Flame & Heat On/Off button on the remote.

Your remote will now have a different frequency communicating with the fireplace.

**NOTE:** When the “BAT” symbol is present on the remote control it is recommended to replace the batteries promptly, to maintain full functionality of the remote/fireplace. The remote transmitter has a battery backup time of only several hours.
