Always use a qualified technician or service agency to repair this fireplace.

! NOTE: Procedures and techniques that are considered important enough to emphasize.

⚠️ CAUTION: Procedures and techniques which, if not carefully followed, will result in damage to the equipment.

⚠️ WARNING: Procedures and techniques which, if not carefully followed, will expose the user to the risk of fire, serious injury, or death.
### Operation

![Figure 1](image)

#### WARNING:
This electric firebox must be properly installed before it is used.

The unit can be controlled by either the manual controls which are located on the upper right of the fireplace or the remote (Figure 13 & 14).

The fireplace is supplied with an IR multifunction remote control.

**NOTE:** To operate correctly, the remote control must be pointed towards the Floating Display™.

### A. Standby
Turns the unit On and Off.

→ Activated by pressing the Standby button on the remote or the unit.

- The unit will turn on with the same functions that it was set to when it was turned Off and the intake temperature will be indicated on the Floating Display™.

**NOTE:** When any button is pressed the intake temperature will be displayed on the Floating Display™ for 5 seconds.

### B. Flame Effects
Turns the flame effect On and Off.

→ Activated by pressing the button on the remote.

### C. Heat ON/OFF
Turns the heater On and Off.

→ Activated by pressing the button on the unit or the remote.

- Indicated by the icon and the intake temperature being displayed on the Floating Display™, for 5 seconds before turning off.

**NOTE:** The unit can be operated in Heat Only Mode. When the unit is only running with the heater, the icon will continuously be displayed on the Floating Display™.

**NOTE:** The heater may emit a slight, harmless odor when first used. This odor is a normal condition caused by initial heating of internal heater parts and will not occur again.

### D & E. Thermostat Controls
Adjusts the temperature set point to your individual requirements. Once the desired set temperature is reached the heater will turn off. The heater will cycle on and off to maintain the desired set temperature. The default temperature setting is 72°F (22°C).

→ Adjusted by pressing the to decrease the set point and the to increase the set point on the unit or the remote.

- **NOTE:** Holding the and the buttons down for two seconds, on the unit, will change the temperature from °C to °F, or vice versa.

### Disable Heat
If desired, depending on the season, the heater on the unit can be disabled. The unit will operate in the same fashion, with remainder of the controls.

Pressing the and buttons on the unit at the same time and holding for 2 seconds will disable and enable the heater.

**NOTE:** When the heater has been disabled and either the or the is pressed the Floating Display™ will indicate “--”.

### F. Color Themes
Different presets of ambient lighting color combinations contained in the unit.

→ Changed by repeatedly pressing the corresponding button on the remote or the unit.

- Cycles through the different preset ambient lighting settings of the unit, this includes different combinations of colours of the flame base and media lighting.

**NOTE:** The last theme of the cycle is a prism where the unit cycles through a variety of colours. Pressing the button stops the cycling and holds the unit on the preferred color, indicated by a “U” - Unfreeze or a “F” - Freeze on the display.

### G. Brightness
Changes the brightness of the lights in the unit.

→ Adjusted by repeatedly pressing the corresponding button on the remote.

- Indicated by the second digit on the Floating Display™ changing to show: “H” (high), and “L” (low).

### H. Sleep Timer
The Sleep Timer can be set to automatically shut off the fireplace after a preset time (from 30 minutes to 8 hours).

→ To set the timer press the timer button on the remote, repeatedly, until the desired time is displayed.

- The Floating Display™ will display the different times as it is adjusted. Once the timer has begun, pressing the button will display the time remaining before the unit turns Off.

**NOTE:** The Sleep Timer can be cancelled at any time by pressing the button repeatedly until the sleep timer displays nothing.

### Resetting the Temperature Cutoff Switch
Should the heater overheat, an automatic cut out will turn the whole unit off and it will not come back on without being reset. It can be reset by turning the power to the unit and waiting 5 minutes before turning the unit back on.

**CAUTION:** If you need to continuously reset the heater, unplug the unit and call technical support at 1-888-346-7539.
Remote Control Battery Replacement
To replace the battery:
1. Slide battery cover open on the remote control.
2. Correctly install one 3 Volt (CR2032 [longer life] or CR2025) battery in the battery holder.
3. Close the battery cover.

Battery must be recycled or disposed of properly. Check with your Local Authority or Retailer for recycling advice in your area.

Maintenance
⚠️ WARNING: Disconnect power before attempting any maintenance or cleaning to reduce the risk of fire, electric shock or damage to persons.

⚠️ NOTE: The fireplace should not be operated with an accumulation of dust or dirt on or in the unit, as this can cause a build up of heat and eventual damage. For this reason the heater must be inspected regularly, depending upon conditions and at least at yearly intervals.

Partially Reflective Glass Cleaning
The partially reflective glass is cleaned in the factory during the assembly operation. During shipment, installation, handling, etc., the partially reflective glass may collect dust particles; these can be removed by dusting lightly with a clean dry cloth.

To remove fingerprints or other marks, the partially reflective glass can be cleaned with a damp cloth. The partially reflective glass should be completely dried with a lint free cloth to prevent water spots. To prevent scratching, do not use abrasive cleaners.

Fireplace Surface Cleaning
Use only a damp cloth to clean painted surfaces of the fireplace. Do not use abrasive cleaners.

Servicing
Except for installation and cleaning described in this manual, an authorized service representative should perform any other servicing.

### Accessories

- River Rocks .................................. DFS1314
- Driftwood Accessory Kit ..................... LF34DWS-KIT
Preparation for service

! NOTE: All components are replaceable from the front of the fireplace while the unit is mounted on the wall, with the exception of replacement of the power cord.

! NOTE: If the power cord needs replacing or if the unit needs to be removed from the wall for any other reason please begin service by following the “PREPARATION FOR SERVICE” instructions, then move on to the section “INSTRUCTIONS FOR REMOVING FROM WALL”.

Tools Required: Phillips head screwdriver

⚠️ WARNING: Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

⚠️ CAUTION: If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

1. Disconnect power source.
   • Unplug the fireplace from the outlet.
   • If unit has been hard wired for power or outlet is not accessible from the front, turn the breaker off at the electrical panel.

2. Remove the front glass assembly by removing the 2 screws (1 on the left and 1 on the right side). These screws secure the front glass panel to the inside of the fireplace. (Figure 4)

3. Lift the front glass assembly off of the 4 mounts located between the outer and inner casing of the fireplace: 2 on the left and 2 on the right. (Figure 3) Carefully place the glass assembly aside in a safe location.

4. Proceed to the instructions within this manual relating to the repair being performed - see Table of Contents for page number.

Instructions for removing from wall

! NOTE: Only required for replacement of the power cord or removal from service.

⚠️ WARNING: Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

⚠️ CAUTION: If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

⚠️ CAUTION: Follow “Preparation for Service” instructions before proceeding.

Mounting - The fireplace may be mounted in one of 3 methods:
   • Surface Mount
   • Recess Mount - Partial In-Wall
   • Flush Mount (completely in the wall)

Identify the type of mounting and follow the appropriate instructions in the following pages.

⚠️ CAUTION: To prevent injury or damage, turn off the breaker in your electrical panel prior to attempting to remove this unit off the wall.

! NOTE: If fireplace is hard wired directly to the electrical panel, and there is not enough slack in the wires within the wall to reach your work area, remove the electrical junction box cover located on the bottom right by removing the 2 screws on the front of the cover. Lift the cover off and set aside. Disconnect the 3 wire connectors connected to the power source, taking note of their original configuration
   • Line: Red wire from unit to the line wire power source
   • Neutral: Thin white wire and thick blue wire to neutral wire from power source
   • Thin black wire and thick white wire are left connected and not changed.

Surface Mount
(Figure 6)

Tools Required: Phillips head screwdriver

⚠️ CAUTION: Follow “Preparation for Service” instructions before proceeding.

1. Remove the decorative acrylic ember-bed pieces from the media tray, which lies along the bottom of the interior or Partially Reflective Glass. A medium sized container such as a bucket or a box will be needed to keep the acrylic ember-bed pieces together.

2. On the bottom of the unit remove the securing screw from the L-bracket. (Figure 5)

3. Lift the unit up and off of the wall.

4. Carefully lay the unit down on a solid flat surface with
![Figure 5](image)

5. Proceed to the instructions within this manual relating to the repair being performed - see Table of Contents for page number.
6. Once repair is complete, reassemble in the reverse order as above.

**Recessed Mount - Partial In-wall**

(Figure 7)

**Tools Required:** Phillips head screwdriver

⚠️ **CAUTION:** Follow “Preparation for Service” instructions before proceeding.

1. Remove the decorative acrylic ember-bed pieces from the media tray, which lies along the bottom of the interior Partially Reflective Glass. A medium sized container such as a bucket or a box will be needed to keep the acrylic ember-bed pieces together.

2. Locate and remove the 4 mounting screws located approximately 3 inches deep in the space between the outer and inner casing on the left and right hand side. There are 2 screws per side, upper and lower going into a stud.  (Figure 7)

⚠️ **CAUTION:** The fireplace should be supported while removing the screws to prevent the unit from falling.

3. Remove the fireplace out of the opening by slightly lifting and pulling forward.

4. Carefully lay the unit down on a solid flat surface with the front of the unit facing up.

⚠️ **NOTE:** If the surface you are using as a work area is a finished surface that is prone to scratches (i.e. hardwood flooring), it is recommended that a protective barrier be used underneath, (i.e. cloth, cardboard, thick plastic).
Flush Mount – Complete In-wall
(Figure 8)
Tools Required: Phillips head screwdriver

⚠️ CAUTION: Follow “Preparation for Service” instructions before proceeding.

1. Remove the decorative acrylic ember-bed pieces from the media tray, which lies along the bottom of the interior Partially Reflective Glass. A medium sized container such as a bucket or a box will be needed to keep the acrylic ember-bed pieces together.

2. Locate and remove the 4 mounting screws inside the unit located on left and right side towards the front. There are 2 screws per side, going from the side panels out into the side of the wall stud that frames the fireplace. (Figure 8)

⚠️ CAUTION: The unit should be supported while removing the screws to prevent the unit from falling.

3. Remove the fireplace out of the opening by slightly lifting and pulling forward.

4. Carefully lay the unit down on a solid flat surface with the front of the unit facing up.

⚠️ NOTE: If the surface you are using as a work area is a finished surface that is prone to scratches (i.e. hardwood flooring), it is recommended that a protective barrier be used underneath, (i.e. cloth, cardboard, thick plastic).

5. Proceed to the instructions within this manual relating to the repair being performed - see Table of Contents for page number.

6. Once repair is complete, reassemble in the reverse order as above.
Switchboard Replacement

⚠️ WARNING: Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

⚠️ CAUTION: If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

Tools required: Phillips head screwdriver.

Small adjustable wrench

⚠️ CAUTION: Follow “Preparation for Service” instructions before proceeding.

1. Remove the 2 screws, that secure the controls assembly (Figure 9), located at the top of the mirror on the right side of the unit.
2. Slide the controls assembly out toward the front of the unit.

⚠️ CAUTION: Ensure that the assembly is removed carefully, ensuring that no wires are caught or over strained.

3. Locate the switchboard (Figure 10).
4. Disconnect the wiring harness from the switchboard.
5. Remove the switchboard by loosening the nuts on the spacer stands.
6. Install the new switchboard on the space stands.
7. Reconnect the wire harness onto the back of the switchboard in its original configuration.
8. Reassemble in the reverse order as above.

⚠️ CAUTION: When re-installing, be sure the wires are guided and tucked into the proper openings along the right side so they are not pinched and allows enough space to reinstall the panel.

---

Relay Board Replacement

⚠️ WARNING: Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

⚠️ CAUTION: If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

Tools required: Phillips head screwdriver

Needle nosed pliers

⚠️ CAUTION: Follow “Preparation for Service” instructions before proceeding.

1. Remove the 2 screws, that secure the controls assembly (Figure 9), located at the top of the mirror on the right side of the unit.
2. Slide the controls assembly out toward the front of the unit.

⚠️ CAUTION: Ensure that the assembly is removed carefully, ensuring that no wires are caught or over strained.

3. Locate the relay board (Figure 10).
4. Transfer the wiring connections from the existing board to the new board.

⚠️ NOTE: Using a flat head screwdriver gently pry between the end of the connectors and the board to release the wires.

5. Remove the relay board off the plastic mounts by pinching the plastic mounting tabs with needle nose pliers. Pull the old board off.
6. Line up the holes on the board and gently press the new board onto the mounts. Make sure the board is secure.
7. Reassemble in the reverse order as above.

⚠️ CAUTION: When re-installing, be sure the wires are guided and tucked into the proper openings along the right side so they are not pinched and allows enough space to reinstall the panel.
AC/DC Adapter Replacement

⚠️ WARNING: Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

⚠️ CAUTION: If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

Tools required: Phillips head screwdriver

⚠️ CAUTION: Follow “Preparation for Service” instructions before proceeding.

Tools required: Phillips head screwdriver

1. Remove the decorative acrylic ember-bed pieces from the media tray, which lies along the bottom of the interior Partially Reflective Glass. A medium sized container such as a bucket or a box will be needed to keep the acrylic ember-bed pieces together.

2. Remove the 2 screws, that secure the controls assembly (Figure 9), located at the top of the mirror on the right side of the unit.

3. Remove the Partially Reflective Glass retaining brackets by removing the 3 screws on each bracket; (3 brackets in total), located on the left and right side of the Partially Reflective Glass. (Figure 13)

4. Remove the Partially Reflective Glass. Carefully place the glass assembly aside in a safe location.

5. Slide the controls assembly out toward the front of the unit.

⚠️ CAUTION: Ensure that the assembly is removed carefully, ensuring that no wires are caught or over strained.

6. Locate the defective AC/DC adapter (Figure 10).

7. Disconnect wires going to the wire connectors and the wires that are attached to the display / control board. (Figure 14)

! NOTE: Using a flat head screwdriver gently pry between the end of the connectors and the board to release the wires.

8. Remove the four screws that secure the AC/DC adapter bracket to the controls assembly.

9. Install the new AC/DC adapter and install all wiring connections.

10. Reassemble in the reverse order as above.

⚠️ CAUTION: When re-installing, be sure the wires are guided and tucked into the proper openings along the right side so they are not pinched and allows enough space to reinstall the panel.

Main Control Board Replacement

⚠️ WARNING: Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

⚠️ CAUTION: If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

Tools required: Phillips head screwdriver

⚠️ CAUTION: Follow “Preparation for Service” instructions before proceeding.

Tools required: Phillips head screwdriver

1. Remove the decorative acrylic ember-bed pieces from the media tray, which lies along the bottom of the interior Partially Reflective Glass. A medium sized container such as a bucket or a box will be needed to keep the acrylic ember-bed pieces together.

2. Remove the Partially Reflective Glass retaining brackets by removing the 3 screws on each bracket; (3 brackets in total), located on the left and right side of the Partially Reflective Glass. (Figure 13)

3. Remove the Partially Reflective Glass. Carefully place the glass assembly aside in a safe location.

4. Locate the defective display / control board (Figure 10).

5. Disconnect wires from old board and transfer to new board. (Figure 14)

! NOTE: Using a flat head screwdriver gently pry between the end of the connectors and the board to release the wires.

6. Remove the relay board off the plastic mounts by pinching the plastic mounting tabs with needle nose pliers. Pull the old board off.

7. Line up the holes on the board and gently press the new board onto the mounts. Make sure the board is secure.

8. Reassemble in the reverse order as above.

⚠️ CAUTION: When re-installing, be sure the wires are guided and tucked into the proper openings along the right side so they are not pinched and allows enough space to reinstall the panel.
Flicker Motor Replacement

**WARNING:** Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

**CAUTION:** If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

**Tools required:** Phillips head screwdriver

**CAUTION:** Follow “Preparation for Service” instructions before proceeding.

1. In the bottom right hand of the unit, remove both of the access covers. (Figure 11)
2. Remove the 2 screws holding the flicker motor to the bracket.
3. Holding the rubber gasket on the shaft, carefully remove the entire assembly.
4. Disconnect the wiring connections from the wire connectors noting their original locations and install the new motor similarly.
5. Properly orient the new flicker motor onto the bracket and re-attach with the 2 mounting screws.
6. Reassemble in the reverse order as above.

**CAUTION:** When removing and replacing the flicker motor try to keep any slight bending of the flicker rod minimal so as to not damage it. If flicker rod is damaged, it should be replaced to ensure proper operation.

**CAUTION:** When re-installing, be sure the wires are guided and tucked into the proper openings along the right side so they are not pinched and allows enough space to reinstall the panels.

---

Flicker Rod Replacement

**WARNING:** Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

**CAUTION:** If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

**Tools required:** Phillips head screwdriver

**CAUTION:** Follow “Preparation for Service” instructions before proceeding.

1. Remove the decorative acrylic ember-bed pieces from the media tray, which lies along the bottom of the interior Partially Reflective Glass. A medium sized container such as a bucket or a box will be needed to keep the acrylic ember-bed pieces together.
2. Remove the Partially Reflective Glass retaining brackets by removing the 3 screws on each brackets; (3 brackets in total), located on the left and right side of the Partially Reflective Glass. (Figure 13)
3. Remove the Partially Reflective Glass. Carefully place the glass assembly aside in a safe location.
4. In the bottom right hand of the unit, remove the two screws and the front access cover. (Figure 11)
5. In the media tray, remove the two screws on either end and the one on the side wall, to remove the clear media tray and the front panel. (Figure 12)
6. Remove the flicker rod by holding the gasket and sliding it to the left. This will disengage it from the motor. It will then be possible to remove it out of the opening.
7. Reassemble in the reverse order as above.

**CAUTION:** When removing and replacing the flicker motor try to keep any slight bending of the flicker rod minimal so as to not damage it. If flicker rod is damaged, it should be replaced to ensure proper operation.

**CAUTION:** When re-installing, be sure the wires are guided and tucked into the proper openings along the right side so they are not pinched and allows enough space to reinstall the panels.
### LED Light Strips Replacement

**WARNING:** Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

**CAUTION:** If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

**Tools required:** Phillips head screwdriver, Wire Snips

**CAUTION:** Follow “Preparation for Service” instructions before proceeding.

1. Remove the decorative acrylic ember-bed pieces from the media tray, which lies along the bottom of the interior Partially Reflective Glass. A medium sized container such as a bucket or a box will be needed to keep the acrylic ember-bed pieces together.

2. Remove the Partially Reflective Glass retaining brackets by removing the 3 screws on each brackets; (3 brackets in total), located on the left and right side of the Partially Reflective Glass. (Figure 13)

3. Remove the Partially Reflective Glass. Carefully place the glass assembly aside in a safe location.

4. In the bottom right hand of the unit, remove the two screws and the front access cover. (Figure 11)

5. In the media tray, remove the two screws on either end and the one on the side wall, to remove the clear media tray and the front panel. (Figure 12)

6. Remove the flicker rod. This can be done by sliding it to the left which will disengage it from the flicker motor.

7. Locate the LED strip that needs to be replaced.

8. Disconnect the wire from the board by pulling gently on the connector at the end.

9. Remove the board from the mounting bracket by pressing in the center of the standoffs to release them.

10. Line up the holes on the board and gently press the new board onto the mounts. Make sure the board is secure.

11. Reconnect the wire.

12. Reassemble in the reverse order as above.

**CAUTION:** When removing and replacing the flicker motor try to keep any slight bending of the flicker rod minimal so as to not damage it. If flicker rod is damaged, it should be replaced to ensure proper operation.

### High Temperature Cutout Replacement

**WARNING:** Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

**CAUTION:** If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

**Tools required:** Phillips head screwdriver

**CAUTION:** Follow “Preparation for Service” instructions before proceeding.

1. Remove the decorative acrylic ember-bed pieces from the media tray, which lies along the bottom of the interior Partially Reflective Glass. A medium sized container such as a bucket or a box will be needed to keep the acrylic ember-bed pieces together.

2. Remove the Partially Reflective Glass retaining brackets by removing the 3 screws on each brackets; (3 brackets in total), located on the left and right side of the Partially Reflective Glass. (Figure 14)

3. Remove the Partially Reflective Glass. Carefully place the glass assembly aside in a safe location.

4. Remove the remaining screw, that secures the controls assembly (Figure 9), located at the top of the mirror on the right side of the unit.

5. Slide the controls assembly out toward the front of the unit.

6. Remove the heating cover by removing the 4 screws: 2 on the left and 2 on the right of the tray. (Figure 14)

7. Locate the high temperature cutout and remove the mounting screw.

8. Remove the 2 screws, that secure the controls assem-
Element Replacement

**WARNING:** Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

**CAUTION:** If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

**Tools required:** Phillips head screwdriver. Needle nosed pliers.

**CAUTION:** Follow "Preparation for Service" instructions before proceeding.

1. Remove the decorative acrylic ember-bed pieces from the media tray, which lies along the bottom of the interior Partially Reflective Glass. A medium sized container such as a bucket or a box will be needed to keep the acrylic ember-bed pieces together.  
   ! **NOTE:** Try to ensure the pieces do not get pushed or wedged underneath the Partially Reflective Glass. They may obstruct the ease of removing the Partially Reflective Glass from the fireplace.

2. Remove the Partially Reflective Glass retaining brackets by removing the 3 screws on each bracket; (3 brackets in total), located on the left and right side of the Partially Reflective Glass. (Figure 14)

3. Remove the Partially Reflective Glass. Carefully place the glass assembly aside in a safe location.

4. Remove the remaining screw, that secures the controls assembly (Figure 9), located at the top of the mirror on the right side of the unit.

5. Slide the controls assembly out toward the front of the unit.

**CAUTION:** Ensure that the assembly is removed carefully, ensuring that no wires are caught or over strained.

6. Remove the heating cover by removing the 4 screws: 2 on the left and 2 on the right of the tray. (Figure 14)

7. From the top panel of the heating assembly housing, remove the 4 screws that hold the element cover to the housing panel.

8. Disconnect wires from the ends of the elements noting their original locations.  
   ! **NOTE:** Using a flat head screwdriver gently pry between the end of the connectors and the element to release the wires.

9. Reassemble in the reverse order as above.

**CAUTION:** When re-installing covers and panels, be sure the wires are guided and tucked into the proper openings along the right side so they are not pinched and allows enough space to reinstall panel.

Blower Replacement

**WARNING:** Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

**CAUTION:** If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

**Tools required:** Phillips head screwdriver. Needle nosed pliers.

**CAUTION:** Follow "Preparation for Service" instructions before proceeding.

1. Remove the decorative acrylic ember-bed pieces from the media tray, which lies along the bottom of the interior Partially Reflective Glass. A medium sized container such as a bucket or a box will be needed to keep the acrylic ember-bed pieces together.  
   ! **NOTE:** Try to ensure the pieces do not get pushed or wedged underneath the Partially Reflective Glass. They may obstruct the ease of removing the Partially Reflective Glass from the fireplace.

2. Remove the Partially Reflective Glass retaining brackets by removing the 3 screws on each bracket; (3 brackets in total), located on the left and right side of the Partially Reflective Glass. (Figure 14)

3. Remove the Partially Reflective Glass. Carefully place the glass assembly aside in a safe location.

4. Remove the remaining screw, that secures the controls assembly (Figure 9), located at the top of the mirror on the right side of the unit.

5. Slide the controls assembly out toward the front of the unit.

**CAUTION:** Ensure that the assembly is removed carefully, ensuring that no wires are caught or over strained.

6. Remove the heating cover by removing the 4 screws: 2 on the left and 2 on the right of the tray. (Figure 14)

7. Remove the 2 screws, that secure the controls assembly (Figure 9), located at the top of the mirror on the right side of the unit.
8. Slide the controls assembly out toward the front of the unit.

⚠️ CAUTION: Ensure that the assembly is removed carefully, ensuring that no wires are caught or over strained.

9. Remove the 2 screws, that secure the cover panel (Figure 14), located at the top of the mirror on the left side of the unit.

10. Remove the three screws on either side of the heater/blower assembly and gently lower the assembly so that the top can be viewed.

⚠️ CAUTION: When removing the blower assembly mounting screws, support the assembly to prevent any damage to the unit.

11. Remove the 6 screws (3 sets) that secure the blower to the assembly (Figure 15).

12. Disconnect the wiring connections noting their original locations.

❗️ NOTE: Using a flat head screwdriver gently pry between the end of the connectors and the blower/fan to release the wires.

13. Properly orient the new blower/fan assembly and connect all of the wiring connections.

14. Reassemble in the reverse order as above.

---

Thermistor Replacement

⚠️ WARNING: Disconnect power before attempting any maintenance or cleaning to reduce the risk of electric shock or damage to persons.

⚠️ CAUTION: If unit was operating prior to servicing allow at least 10 minutes for lights and heating elements to cool off to avoid accidental burning of skin.

Tools required: Phillips head screwdriver.
Needle nosed pliers.

⚠️ CAUTION: Follow “Preparation for Service” instructions before proceeding.

1. Remove the decorative acrylic ember-bed pieces from the media tray, which lies along the bottom of the interior or Partially Reflective Glass. A medium sized container such as a bucket or a box will be needed to keep the acrylic ember-bed pieces together.

❗️ NOTE: Try to ensure the pieces do not get pushed or wedged underneath the Partially Reflective Glass. They may obstruct the ease of removing the Partially Reflective Glass from the fireplace.

2. Remove the Partially Reflective Glass retaining brackets by removing the 3 screws on each brackets; (3 brackets in total), located on the left and right side of the Partially Reflective Glass. (Figure 14)

3. Remove the Partially Reflective Glass. Carefully place the glass assembly aside in a safe location.

4. Remove the remaining screw, that secures the controls assembly (Figure 9), located at the top of the mirror on the right side of the unit.

5. Slide the controls assembly out toward the front of the unit.

⚠️ CAUTION: Ensure that the assembly is removed carefully, ensuring that no wires are caught or over strained.

6. Remove the heating cover by removing the 4 screws: 2 on the left and 2 on the right of the tray. (Figure 14)

7. Remove the 2 screws, that secure the controls assembly (Figure 9), located at the top of the mirror on the right side of the unit.

8. Slide the controls assembly out toward the front of the unit.

9. Remove the 2 screws, that secure the cover panel (Figure 14), located at the top of the mirror on the left side of the unit.

10. Remove the three screws on either side of the heater/blower assembly and gently lower the assembly so that the top can be viewed.

⚠️ CAUTION: When removing the blower assembly mounting screws, support the assembly to prevent any damage to the unit.

11. Locate the thermistor, carefully cut the tie wrap attaching the thermistor to the standoff.

12. Disconnect the wiring connections on the display/control board.

13. Install the new thermistor and secure it with a new tie wrap. Ensure that the excess wire is secured in such a way that it does not obstruct other components.

14. Connect all of the wiring connections.

15. Reassemble in the reverse order as above.
## Troubleshooting Guide
