The easiest way to turn designs into reality
Almost everything about Opti-myst is customizable: installation length, number of visible sides, flame shape, and the media bed. And with no venting or gas lines to worry about the possibilities are endless.

Exclusive cool mist flame technology
Next generation Opti-myst flames are bigger and allow customizable patterns to suit the installation. Opti-myst is also the only water-based flame technology that is safe to touch.

Simply frame-and-go
Opti-myst is ideal for any location and any surface or finishing material. Whether above or below grade, on an inside or outside wall, simple framing and electrical connection is all that’s required.
